An input field accepts integer values from 18 to 99, including.

Conduct testing using Boundary Values Analysis and Equivalence Partitioning techniques.

Equivalence Partitioning	Boundary Values Analysis
Enter the number 50 in the field	Enter the number 17 in the field
Enter the number 15 in the field	Enter the number 18 in the field
Enter the number 120 in the field	Enter the number 99 in the field
	Enter the number 100 in the field
