Summary

I am a Manual QA Engineer with comprehensive experience in testing web applications, slot games (3×3 and 5×3 with bonus games and promo features like tournaments and free spins), and SRM systems. My experience includes testing CRM/SRM features like responsive design, user roles, and data handling. I can create detailed test documentation, perform different types of testing, and collaborate effectively with development teams. My background as a Quality Systems Manager in the pharmaceutical industry has equipped me with a strong attention to detail and a deep understanding of quality standards. I am highly motivated to enhance my skills and contribute to the improvement of QA processes.

Testing Skills

- Manual QA, Web/Mobile testing;
- Writing: bug reports, test cases, test plans, check-letters;
- Knowledge of SDLC,STLC;
- Understanding and using test design techniques and types of testing;
- Knowledge of client-server architecture;

Additional Skills

- Understanding of Agile Development Process ;
- Understanding UX|UI and experience with using Figma;
- Knowledge in API testing using Postman;
- Basic knowledge in creating auto-tests in Selenium IDE;
- Basic skills of writing SQL commands in MySQL;
- Basic HTML/CSS and semantics;
- Knowledge of Web technologies (HTTP, REST API, JSON, XML)
- Testing gaming mechanics
